

Web Developer Assessment

Instruction for the Candidate

Welcome, and thank you for applying for the Web Developer position! This assessment is designed to evaluate your technical skills and creativity. Please read the instructions carefully and complete the task as per the requirements.

Objective

To create a responsive and visually appealing landing page inspired by the structure and design of <https://www.airasia.com/>. Your design should demonstrate your proficiency in web development, including HTML, CSS, and JavaScript. Feel free to use any frameworks or libraries you are comfortable with (e.g., React, Bootstrap, etc.), but ensure that your code is clean and well-documented.

Requirements

1. Design and Layout:

- Create a landing page with a clean, modern design.
- Include sections such as:
 - Header with navigation menu
 - Hero section with a prominent call-to-action button
 - Features or highlights section (e.g., 3-4 key features of a service or product)
 - Testimonials or customer reviews section
 - Footer with contact information and links to social media.

2. Functionality:

- Ensure the landing page is responsive and mobile-friendly.
- Add basic interactivity (e.g., hover effects, clickable navigation links).
- Include a simple form for user input (e.g., email subscription or contact form).

3. Technical Criteria:

- Write clean and well-organized code.
- Use semantic HTML5 elements.
- Include comments in your code to explain your logic.
- Implement CSS for styling; you may use a preprocessor like SASS if preferred.
- If using JavaScript, include at least one interactive feature, such as a carousel or modal popup.

4. Submission Details:

- Host your project on a platform such as GitHub or GitLab.
- Provide a README.md file that includes:
 - A brief description of the project
 - Instructions for setting up and running the project locally
 - Any additional notes or features implemented
- Share the repository link with us.

Evaluation Criteria

Your submission will be evaluated on the following:

1. **Technical Proficiency:**
 - Code quality, structure, and organization.
 - Correct implementation of required features.
 2. **Design and Creativity:**
 - Aesthetics and user experience of the landing page.
 - Creativity in implementing the design and features.
 3. **Responsiveness:**
 - Compatibility across different devices and screen sizes.
 4. **Documentation:**
 - Clarity and completeness of the README file.
-

Deadline

You have **48 hours** to complete and submit this task. If you encounter any issues or have questions, please contact us at +60 17-641 5158.

We wish you the best of luck and look forward to reviewing your submission!
